What is the OccHealth Portal?

Provides a user interface of information and resources to the occupational health community. Access to training materials, security documentation, and mission information is available to government and military domains worldwide.

Hearing Conservation

The DOEHR5 HC Release 3.0 was deployed in June 2002. DOEHR5-HC provides medical surveillance for noise-exposed populations, diagnostic evaluation and management of auditory pathology, refers hearing loss illness and injury, documents auditory readiness status utilizing quantifiable metrics, and documents medical outcomes.

Industrial Hygiene

The DOEHR5-IH will provide access of data and information to users throughout DoD including Military Treatment Facility (MTF) commanders, industrial site commanders, lead agents, installation agencies, and other users of comprehensive occupational health information. The DOEHR5-IH will capture data on occupational and environmental health exposures of personnel for transfer to the computer-based patient record.

Hearing Conservation Page - Click One of the Bullets in the the Screen or Select from the Menu on the Right Hand Side
